

Even the moon is round.

Solaro blends soft with tough. Round with corners end edges. Sinks with plates. Finally a form, that fits perfectly.

DESIGN HIGHLIGHT

Solaro

Solaro R-100L

Technical data

Functional

Draining, washing, chopping – do it all right there at the sink. With the included accessories, the bowl becomes a multifunctional workspace.

Spacious

The 200 mm deep bowl offers great filling volume and plenty of space for large pots and baking trays. Fits a cabinet from 60 cm.

Flexible

Topmount, undermount or flush-mount: the new design approach combines all installation types in one and reduces the number of stock keeping units (SKUs).

Work and no work mode

Rethink the kitchen sink: With the right accessories, the sink becomes a multifunctional workspace. In “standby mode” it can be an additional work surface, or it can just look beautiful.
